

Two-thirds of the earth is covered by water. The rest by Swissair.

While it is common knowledge that Swissair flies from Toronto and Montreal to Zurich, some travellers aren't fully aware this airport is also the changing point to over 100 destinations worldwide. What's more, since Zurich is considered one of the world's most efficient airports, with our own terminal and Swissair, one of the top airlines, you can rest assured that you'll always get the

finest service in the sky or on earth. The land part, that is.

It's equally good to know that all Swissair longhaul aircraft also have the same three classes of service worldwide: First, Business and Economy. Swissair features the state-of-the-art MD-11 aircraft on all flights from Toronto and Montreal.

Time is everything.®

Swissair participates
in Air Canada's,
Delta's and
USAir's frequent
flyer programs.
